DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4 and 6-7 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 6,495,816. Although the conflicting claims are not identical, they are not patentably distinct from each other because '816 provides a photodiode having an output providing a current, a junction diode between the output of the photodiode and ground whereby the current is converted to a log voltage with the termination of the output with the junction diode providing the log voltage, an additionally junction diode connected between the output of the first junction diode and ground, whereby the output voltage at the output is multiplied by the number of diodes connected between the output and ground, and a PIN diode:

Allowable Subject Matter

Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record, taken alone or in combination, fails to disclose or render obvious projecting an ultrashort pulse toward a sea surface and detecting returns reflected by subset objects, in combination with the rest of the limitations of claim.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tsuji, Takahiro (JP 405180695A) discloses a light measuring circuit and output voltage range setting method.
